

High Voltage Test Set Model HVA-25/25

ADWEL International Ltd. offers a commercial AC High Voltage Testing Instrument. Model HVA-25/25 is to be used for testing electric shock resistant footwear for C.S.A. specifications.

The test set Model HVA-25/25 is completely self-contained in a metal laboratory style cabinet and incorporates all the equipment necessary for testing footwear to C.S.A. requirements.

High Voltage AC Test Set *Features*

- Completely self-contained in a metal laboratory style cabinet
- Used for testing electric shock resistant footwear
- Easily operated and enables verification of high voltage tests
- Instrument indicates High Voltage ON as well as other status

This AC High Voltage Tester is easily operated and enables verification of high voltage tests quickly and accurately. The shoe to be tested can simply be placed on the proper test platform and when the plexiglass door is closed the instrument becomes 100% safe.

The instrument indicates High Voltage ON as well as other status during the test procedure. The test set is adjustable from 0 - 25000 V and the high voltage is indicated on a Kilovoltmeter.

Specifications

Input	120V, 60Hz (230V 50Hz optional)
Output	0 - 25,000 V @ 25 mA
Metering	
Voltmeter	0 - 25,000 V
Milliammeter	0 - 1/10 mA
Voltage Adjustment	0 - 25,000 Continuous
Safety Features	Automatic high voltage cutout and disconnect on breakdown in secondary 2-10 mA Circuit breaker protection in primary
Indications	Full set of status light indicating: HIGH VOLTAGE ON HIGH VOLTAGE OFF POWER ON FAULT
Dimensions	51cmW x 46cmD x 91cmH (20"W x 18"D x 36"H)
Weight	110 lbs (50 kg)

Specifications subject to change without notice
